

SD-Branch 1000

The SD-Branch 1000 is a cloud-based SD-Branch solution that provides LAN, WAN, optional integrated WiFi and LTE connectivity and built-in Remote Site Automation to improve uptime, responsiveness, and cost effectiveness of managing remote sites. Key features of the SD-Branch 1000 include:

- **Multi-Tenant Cloud Managed, Zero Touch Provisioning, Built-in Remote Site Automation**
- **Integrated Branch Office Network Connectivity**
 - o 4 Gigabit Ethernet Ports (LAN/WAN configurable)
 - o 2 USB Ports & Console Port
 - o Expansion slots for optional integrated WiFi and LTE
 - o Small form factor, fan-less design for quiet operation
- **Remote Site Automation capabilities** including:
 - o WAN monitoring and automated WAN and internet recovery
 - o Automated failover of business critical traffic to LTE
 - o Automated rules and actions for Ping and HTTP tests
 - o Discovery of connected branch office devices
 - o Vulnerability scans to identify open ports and possible security vulnerabilities
 - o Remote power control and automation
 - o UPS connectivity and status
 - o Secure VPN capabilities
 - o Open APIs for easy integration
